More by DHagen:

The Fortune-telling Cube can create 3456 possible, full-sentence fortunes! It has the same appeal as the famous Magic 8 Ball and Ouija Board. However, the Fortune-telling Cube is far more sophisticated and more entertaining. The Cube doesn't have to be solved, but simply randomized. (The Cube is lots of fun, but, sadly, the fortunes are no more accurate than those of the Magic 8 Ball!)

The Fortune-telling Cube is a "phrase-randomizer" based upon a Rubik's Cube mechanism. One of 24 possible starting phrases is combined with one of 6 possible middle phrases and with one of 24 possible ending phrases to make up the 3456 possible grammatically-correct sentences.

Here's how it works:

1. Randomize the cube.
2. Without looking, select one of the RED edge faces -- the starting phrase of the fortune.
3. Follow the pointer to the WHITE central face -- the middle phrase of the fortune.
4. Follow the pointer to the BLUE corner face -- the ending phrase of the fortune.

Sometimes the phrases will be topsy-turvy, but easy enough to read. (See the supplemental photos for several examples.)

Step 1: What You Will Need

Materials:

- Rubik's Cube
- Avery-type Labels, 2-2"x4" labels per 4"x6" sheet

Tools:

- Your fingers
- Scissors
- Computer
- Color Printer

The materials should cost less than \$20.

After:

(/file/EYBISZ1CBOT/USA)

Before:

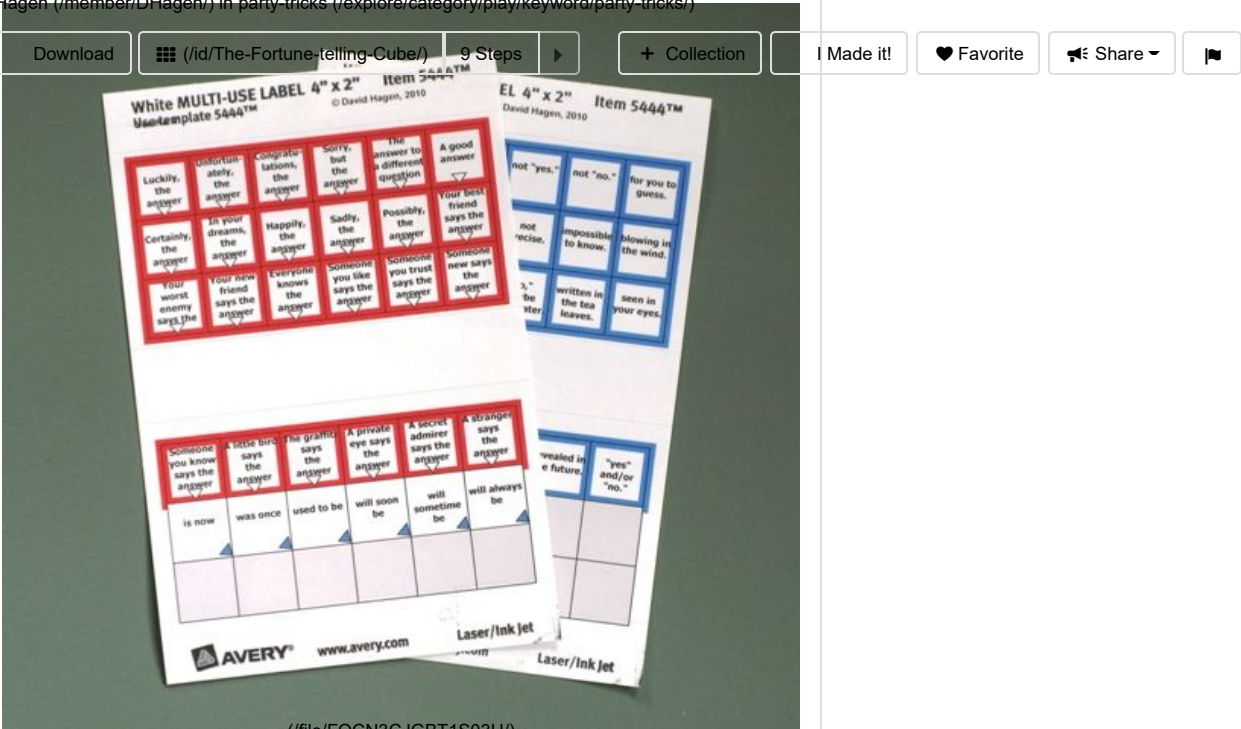

(/file/ELHZEKCBOT/USA)

Take your Rubik's Cube and remove all of the stickers! Just peel them off to make an all-black cube. You may need to use some solvent to get the glue residue off, then clean and dry the cube.

Step 3: Print the Fortune Stickers The Fortune-telling Cube

by DHagen (/member/DHagen/) in party tricks (/explore/category/play/keyword/party-tricks/)

There can be many different "themes" for your Fortune-telling Cube.
I have created the following as examples:

- Yes/No/Maybe** (Shown here in the photos.)
 - e.g. Sorry, but the answer is now "no."
 - e.g. Everyone knows the answer will soon be "yes."

- Preteen Party (PG)**
 - e.g. The one next to you is certainly good looking.
 - e.g. One of your friends will soon be telling a lie.

- Teen Party (PG-13)**
 - e.g. The one you kissed wants to be holding your hand.

e.g. Everyone appears to be telling your secrets.
The Fortune-telling Cube by DHagen (/member/DHagen/) in party-tricks (/explore/category/play/keyword/party-tricks/)
e.g. The one you love is now sleeping around.

Download (https://cdn.instructables.com/FJL/The-Fortune-telling-Cube/) 9 Steps

+ Collection I Made it! Favorite Share

In the Workplace

- e.g. One of your workmates appears to be sucking up to the boss.
- e.g. One of your managers is sabotaging your projects.

It's All About You

- e.g. Sadly, you used to be good looking.
- e.g. I think you will soon be talking too much.

Love, Love, Love (This one makes a GREAT Valentine's Day present!)

- e.g. My love for you is always growing stronger.
- e.g. Our relationship will forever be one of a kind.

I'm providing links to pdf and Word files containing all of my labels. You may use my fortune labels or else you can create your own labels (see Steps 7 & 8, below). You will need to print two label pages (using two blank label sheets) for one Fortune-telling Cube. Set up your printer for printing 4"x6" sheets (like for photos), turn off "shrink-to-fit", turn on "borderless prints", or ??? (Each printer is different.)

All Labels.pdf
Download (https://cdn.instructables.com/ORIG/FJE/XJ83/GBVJ23YV/FJEXJ83GBVJ23YV.pdf)
(https://cdn.instructables.com/ORIG/FJE/XJ83/GBVJ23YV/FJEXJ83GBVJ23YV.pdf)

All Labels.doc
Download (https://cdn.instructables.com/ORIG/FJB/JRXU/GBT1NE3F/FBJRXUGBT1NE3F.doc)
(https://cdn.instructables.com/ORIG/FJB/JRXU/GBT1NE3F/FBJRXUGBT1NE3F.doc)

Step 4: Cut Out the Stickers

Use a sharp pair of scissors (or a paper cutter) to cut out the individual stickers. When finished, you will have 24 red-bordered stickers, 6 white stickers, and 24 blue-bordered stickers.

Step 5: Stick on the Stickers The Fortune-telling Cube

DHagen (/member/DHagen/) in party tricks (/explore/category/play/keyword/party-tricks/)

Share

Take the 24 red-bordered stickers, one at a time, peel off the backing, and stick them onto the 24 edge faces of the naked Rubik's Cube. Place them so that the pointer points to the corresponding central face. It won't matter which label goes where.

Take the 6 white stickers, one-at a time, peel off the backing, and stick them onto the 6 central faces of the cube. The orientation, and which goes where, doesn't matter.

Take the 24 blue-bordered stickers, one at a time, peel off the backing, and stick them onto the 24 corner faces of the cube. Which goes where doesn't matter, but place it right-side-up when it's in the bottom righthand corner. (That way the middle and ending phrases will have the same alignment.)

Now your Fortune-telling Cube is ready for action!

Step 6: My Fortune Scripts The Fortune-telling Cube

Yes/No/Maybe

Start Phrase (/id/The-Fortune-telling-Cube) 9 Steps Ending Phrase Collection

Start Phrase	Middle Phrase	Ending Phrase
Luckily, the answer	is now	"yes."
Unfortunately, the answer	was once	"no."
Congratulations, the answer	used to be	"maybe."
Sorry, but the answer	will soon be	not "yes."
The answer to a different question	will sometime be	not "no."
A good answer	will always be	for you to guess.
Certainly, the answer		just what you want.
In your dreams, the answer		not what you want.
Happily, the answer		precise.
Sadly, the answer		not precise.
Possibly, the answer		impossible to know.
Your best friend says the answer		blowing in the wind.
Your worst enemy says the answer		"yes," but for a limited time only.
Your new friend says the answer		"no," but for a limited time only.
Everyone knows the answer		"yes," maybe "no" later.
Someone you like says the answer		"no," maybe "yes" later.
Someone you trust says the answer		written in the tea leaves.
Someone new says the answer		seen in your eyes.
Someone you know says the answer		trying to tell you something.
A little bird says the answer		keeping you awake at nights.
The graffiti says the answer		messing with your mind.
A private eye says the answer		told better by flipping a coin.
A secret admirer says the answer		revealed in the future.
A stranger says the answer		"yes" and/or "no."

These are my tables for the fortune scripts -- the 24 starting phrases, the 6 middle phrases, and the 24 ending phrases for seven different "themes". I've included a link to pdf and Word files, which contain all of the fortune tables. In the Word document, you can edit the fortunes to suit yourself ... or you can make up your own fortunes, from scratch (see Steps 7 & 8).

Step 7: DIY Fortune Scripts (optional)

The Fortune-telling Cube

by DHagen (member/DHagen/) in party-tricks (/explore/category/play/keyword/party-tricks/)

Starting Phrase	Middle Phrase	Ending Phrase

I Made it! Favorite Share

Creating your own fortune scripts is a lot of fun. But it's not as easy as it seems - if you aren't careful, your fortune sentences won't come out right.

The **starting phrase** is usually the subject (with modifiers). It's important to stay consistent with the subject. Make them all: 1st person singular ("I"), 2nd person singular ("you"), 3rd person singular ("he/she/it"), 1st person plural ("we"), 2nd person plural ("you"), or 3rd person plural ("they"). If you pick 3rd person singular, try to avoid "he" or "she" by using "He/she" or "The person", "Someone", "One of you", etc. Start with a capital letter.

The **middle phrase** is usually a version of the verb "to be" (with modifiers) selected to match the subject form in the starting phrase. E.g. "The person / is often / ..."; "The person / will soon be / ..."; "The person / wants to be / ..."; etc.

The **ending phrase** is usually a restatement of the subject that was used in the starting phrase. This can be an adjective (e.g. "The person / is / smart.") or a noun (e.g. "The person / is / a jerk."). End with a period.

If you put in negatives like "not", decide where you are going to use them and use them only there. E.g. use "not"s only in the ending phrase -- "The person / is / not a jerk..". If you use them in two different places you can wind up with nonsense when the parts are randomly put together -- "The person / is not / not a jerk.."

I'm providing a blank work sheet, both as a pdf and as a Word file. Good luck!

Once you've composed your fortune scripts, it's time to make your fortune stickers.

I usually do this by pasting the phases from the fortune-script tables into a sticker template. I have included my blank templates below as Word documents. The font will have to be pretty small. I usually use Tahoma at 7 points, bold, and make it this way in the table first, then past the text into the text boxes one at a time. (Arial Narrow , 8 point, bold, might also work well.)

Now you are ready to make your one-of-a-kind Fortune-telling Cube. Have fun!

Step 9: The Digital Version

The screenshot shows an Excel spreadsheet with the following content:

- Row 1:** Fortune-telling Cube
- Row 2:** 1/18/2009, 2/16/2009, 8/16/2009, 7/14/2010
- Row 3:** © David Hagen
- Row 4:** Pick a Theme, put in its number, & press "Enter": 1
- Row 5:** Themes
- Row 6:** 1. Yes/No/Maybe
- Row 7:** 2. Pre-Teen Party (PG Rated)
- Row 8:** 3. Teen Party (PG-13 Rated)
- Row 9:** 4. Adult Party (R Rated)
- Row 10:** 5. In the Workplace
- Row 11:** 6. You in the Future
- Row 12:** 7. You in the Present
- Row 13:** 8. Love
- Row 14:** 9. Do It Yourself
- Row 15:** Unfortunately, the answer will soon be messing with your mind.
- Row 16:** 24 x 6 x 24 = 3456 possible fortunes! (One Theme per cube.)
- Row 17:** 1. Scramble the cube.
- Row 18:** 2. Pick the top red square facing you (no peeking).
- Row 19:** 3. Follow the arrows, from red to white to blue.
- Row 20:** 4. Read your fortune!
- Row 21:** Note: the white & blue squares may be topsy-turvy relative to the red square.
- Row 22:** The white & blue squares will be aligned with each other.

If you're not a hands-on type of person, you can still enjoy playing with the Fortune-telling Cube. Here is the digital version. I actually use this Excel file to work out my fortune-telling scripts. Enjoy!

(Note: This Excel Program uses some sophisticated functions and may not run correctly on all computers. If it doesn't work for you, try going to "Tools" in Excel, clicking "Add Ins...", then checking the box that says "Analysis ToolPac". Good luck!)

The Fortune-telling Cube by DHagen (/member/DHagen/) in party-tricks (explore/category/play/keyword/party-tricks/) 2010-08-07

Hey Buddy, that's a cool idea. At first I thought it wouldn't work at all with a 4x4x4 cube. I thought the sentence structures would have to be more complicated. But it could work with the same 3-part sentences. The instructions would be slightly more complicated. Something like:

Download

It's not complicated. But it could work with the same 3-part sentences. The instructions would be slightly more complicated. Something like:

"Randomize the cube, then, with your eyes closed pick any red face for the start. Go to the adjacent white central face for the middle phrase, and then go to the nearest blue corner for the ending phrase." (See picture 1.) Or you could still use the little pointers, but for the ending phrase you would sometimes have to go across the cube to the far side. (See picture 2.) Now you have 48 starting phrases, 24 middle phrases, and 24 ending phrases for 27648 possible fortunes! Of course the stickers would have to be resized. Next you're going to ask me about 5x5x5 cubes.

DemeGeek (/member/DemeGeek/) ▶ **DHagen (/member/DHagen/)** Reply

Thanks for the reply! I was just wondering because I have one here. :P Though now I am curious, have you thought of how a 5x5x5 cube could work?

Flag

DHagen (/member/DHagen/) (author) ▶ **DemeGeek (/member/DemeGeek/)** Reply

OK, you asked for it. Here are my thoughts for making a 5x5x5 Fortune-telling Cube. See my diagram (click to enlarge): This will make 4-part gramatically-correct sentences. With 72 starting phrases, 48 first-middle phrases, 6 second-middle phrases, and 24 ending phrases, this will give 497,664 possible fortunes!

Reply

Thanks for suggesting an improvement. You could protect the sticker paper by applying a clear plastic layer. Do this after printing the labels in Step 3, and before cutting them out in Step 4. I found that 2" clear packaging tape works great for this. (Avoid wrinkles by first sticking one end of the tape down on a table, then aligning the label sheet under the raised portion of the tape.) You could also use the clear sticky plastic sheets used for screen protectors.

Duuuuuuude. You may very well be onto something huge. If you could come up with the right combination, and put it on one of those mini-rubik's cubes, this could totally be the ultimate dungeon-master's randomization die. Pretty sure nobody has anything like a 3456 sided die. Not that I'm a geek or anything... O.O

Reply

2010-07-21

Great idea for a new application! Here's how to make your 3456-sided die (I think): For the Starts put: 1, 2, 3, ..., 24 (24 total). For the Middles: + 0, + 24, + 48, ..., + 120 (6 total). For the Ends: + 0, + 144, + 288, ... + 3312 (24 total). The smallest value will be $1 + 0 + 0 = 1$. The largest value will be $24 + 120 + 3312 = 3456$.

The Fortune-telling Cube

Also, I failed to mention earlier, there are lots of combinations possible described above. You can make these other combinations by rowing up or the numbers (eg. Starts could have 1, 2, 3, 1, 2, 3, 1, 2, 3, etc.) and then applying the same sort of mathematical logic for the rest of the cube.

 But also the thing is somebody could see what moves they had to do from the current number to the one that they need, you cannot on a regular die.

 DIM (did it myself). Using MS Word, I set up for a 4x6 page size and then used the Draw utility -- set up the "grid" for a good spacing, played with the line widths and colors, drew lots of boxes, moved them around, checked out the printing, etc., etc. BTW, if you have Word, I uploaded the doc files.

Viewers. Thanks for all of the kind comments, and for providing some great new ideas for this Instructable! If you want to try out something new, don't miss Step 9 -- the Digital Version. If you have MS Excel, this is, by far, the easiest way to try something out before going to the trouble of making a Fortune-telling Cube. In the Excel file go to Row 270 and you will find a blank table ("DIY"). Enter your fortune phrases, then go back to the top and enter "9" into the box specifying the theme you want to see. Press F9 (PCs) or Cmd= (Macs) to randomize your "fortune".

Nice 'ible! FYI, the last picture in the intro has a typo. Instead of saying "Sorry, the answer will **always** be not precise" it says "Sorry, the answer will **always** be not precise". Just a pointer!

Thanks! It's fixed now. (BTW, I had to read your comment three times to see the difference in your two "Sorry..."s!) Good job of editing. Let me know if you find any other errors.

Create your very own sentences. I did that and at a small party had everyone reach into a cloth bag and pull out their fortunes. Frankly it was amazing and a bit scary at how appropriate the fortunes were for each. Its fun and easy, so make up your own sentences. Have fun being creative. Sincerely, Lynette Wood, a creative artist in largo, fl

How do you know where to look for your fortune? Is it just the first one you see
is the one you use?

The start is on the honor system. In practice, it's easy. Just roll
the cube around with your eyes closed, stop, then open your eyes and
read the red square that's at the top (and the only one that is right-side-
up).

Oh, I love this! I do card readings and this would be so funny to have on my
table at a psychic fair. The Shakespearean insults idea is fantastic! Dungeon
master dude, I doff my flea-bitten cap at thy poxied visage. That is also a clever
idea. I used to be a paralegal and legislative assistant a long time ago. I was a
little surprised to find out that an astounding number of attorneys and
lawmakers keep a Magic 8-Ball in their offices. Some refer to them regularly.

You could do some interesting "refrigerator poetry" type phrases, too. "As a bird
chirps -- three hammers -- fly diligently"

Ooooh! Haiku cube (or Hai-kube if you will) would be

interesting! Or Shakespearean insults!

I think the Haikube would be fantastic. If you don't like things too gibberishy, you could related all the phrases to some theme (<http://godzillahaiku.tumblr.com/>).
