

Supplies:

Small glass cup or jar with a diameter of approximately 2.5" (6.8cm).

Vinegar, wine, beer or juice to use as liquid bait.

Drop of soap (optional).

Paper, scissors and glue (to make the cone).

Instructions:

Cut along solid lines.

Score along the dotted line (by tracing it with a ball point pen or another blunt instrument which will leave a dent in the paper without piercing it).

Fold the dotted line.

Glue the tabs.

Put about an inch (2.5cm) of your liquid bait in your jar and add the optional soap (this will speed up drowning).

Cover with your cone top.
