

Build Your Own Google Cardboard Viewer

Marc Natanagara 2015 @marcnata

Need: piece of thin corrugated cardboard about the size of the lid of a pizza box; two lenses (see link below); tiny square of sponge; glue stick; white glue; conductive copper tape (optional).

DIRECTIONS:

1. Print this template.
2. Cut out pieces only around thick outline.
3. Glue to cardboard using a glue stick, so template is removeable.
4. Cut cardboard and template along solid lines. Do not remove black inner areas.
5. Crease and fold cardboard toward you along dotted lines.
6. Cut and remove black inner areas.
6. Assemble using directions at:
