

**Cut and remove** the green square to make a "parking spot" for engraving each face.

**Engrave** the pink area.  
**Cut** the black lines.

**Cut and remove** the green square to make a "parking spot" for engraving each face.

**Engrave** the red area.

Engraving

Pack

If the green triangle can't fit in the white negative space of your design, it won't make a good mold.

Make sure the yellow dot fits in all of your thin engraving spots.

Have the pack around to find the trouble spots and modify your design accordingly. There are several spots on this design that would need attention.
