

Ice-hockey puck with LED lights

for playing on the lake in the winter evenings when it gets dark early

Several of them made. Hard hits are OK. Two AAA batteries sufficient for 1 season.

Switch on by twisting wires. For transportation fix wires with tape so that they do not touch.

Dry puck at home by putting in warm place.

Goal posts with LED light as well.

Old Mobile phone battery

two-pin socket with wires from old PC

White LED Plastic container (food box or some bottle milk color).
