

# How to needle felt a bee-utiful little bumble bee.

**Supplies** I forgot to include a tiny bit of brown and pink roving for the details, so get those too.

Wrap yarn around the cardboard until it becomes a rounded oval shape.

Get some roving, wrap it around the ball and needle felt it until its in place. Do this until the ball is covered.

Get a strip of colour for his band and attach it around his middle.

Get the wing colour. Felt it on the pad until it becomes flat. Then cut out the shape on the right for wings.

Use the needle tool to felt through the center of the wings into the bees back to attach them.

Use the awl to punch two holes in the bees face for its eyes. Insert the eyes into the holes.

Get a tiny bit of darker roving for his mouth and stinger. Use the single needle to felt them into place. Cut off the excess and felt in the edge.

Finish him by getting two little balls of pink and felt them above the mouth for blush.
