

Personal Crest “Get To Know Me” Project

Introduction

Family crests, also known as a Coat of Arms, were an image or design usually in the form of a shield that had information about a given family and their achievements. The basic idea was someone could see a certain family’s crest and be able to tell what was important to that them.

In this project you are going to design, model, and 3D print your own personal crest that represents who you are.

Personal Crest Design Criteria

Your design must include different elements/features that represent the four prompts listed below:

- Something you like to do
- Something you are proud of
- Something that makes you happy
- A goal you would like to achieve

Size Constraint: (for 3D model)

$\frac{3}{8}$ " x 3" x 2"

Brainstorm

Use the spaces below to list a few ideas for each of the four things you need to include in your design
