

## CHALLENGE : COASTER

## COASTER BODY DESIGN – RESTRAINT SYSTEM DESIGN

Directions: This part of the design will require you to illustrate your proposed restraint system for your car design. Even though your group will only be selecting one of your designs, Mr. Hallstein will still need to see your concepts for approval. You should include materials you will be using, how many of each material, and total number of proposed passengers. Costs will be listed on your expense sheet.
