

Method A (For Slicing the Egg in half or close to half)

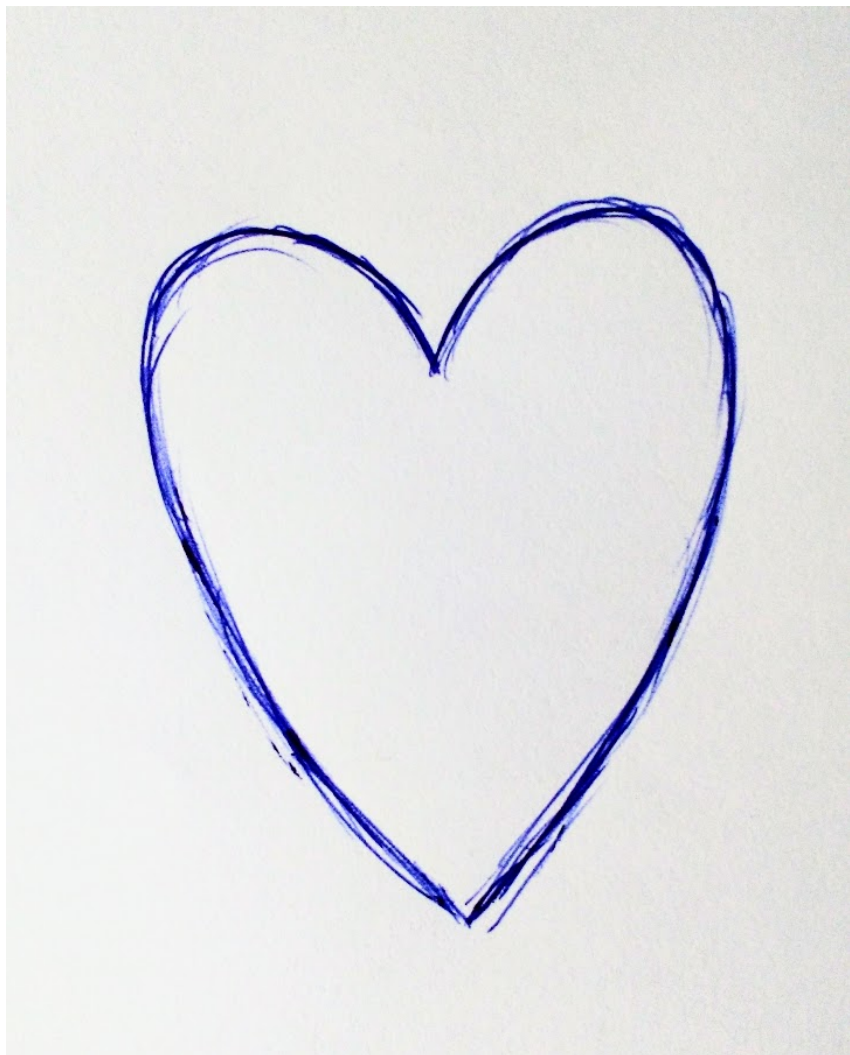

Place rubberband around egg and gently nudge into position with fingernail or pencil point

Trace around rubberband with a pencil

Method B (For Creating a Symmetrical Window)

1) *Draw your shape freehand, in this case a heart*

2) *Cut out the heart*

3) Go over the edge with a wide tipped marker and then fold the heart along its length

Left side of folded heart showing overlap along middle area

Right side of folded heart showing overlap towards bottom

4) *Trim away the overlap that is visible on both halves*

5) *Left view of folded heart with overlap trimmed away*

6) *Right view of folded heart with overlap trimmed away*

You now have a symmetrical heart ❤️
