

Do's and Don'ts for Your Sanitation Station

	Do	Don't
Shoes	Do put here any shoes that you wore out. Spray or wipe shoes when necessary.	Don't touch these shoes besides for use. Keep any "house shoes" separate.
Packages	Do put packages or mail aside to decontaminate for at least 24 hours. Do disinfect if you need to open it now.	Don't open packages without disinfecting or isolating them first. Don't skip washing your hands afterwards.
Small Items (wallet, keys, etc.)	Do keep within Sanitation Station or disinfect before moving elsewhere.	Don't carry them around the house and set them on other surfaces.
Cleaning Supplies	Do keep cleaning supplies near to prevent going across your home to get them.	Don't hoard supplies limiting access for others.
*Trash Bin	Do put dirty wipes, gloves, masks, and any possibly contaminated items in here.	Don't forget to take this out every once in a while.
*Hamper	Do use for washable face coverings and clothes.	Don't touch this without washing hands after.
*Boundary Line	Do use common items like tape or natural barriers like a rug.	Don't let objects possible of exposure cross this line.
Mask/gloves	Do use a face covering when you go out.	Don't touch the outside portion of the mask when taking it off.

*These locations can be eliminated with careful handling

Reminders: Wash your hands, avoid touching your face, and socially distance
