

What vegetables can you grow on Phytodriffs – Floating Treatment Gardens?

There is a big variety of plants that can flourish on floating gardens. Usually, plants that can be grown hydroponically can also be planted on Phytodriffs.

Below is a diagram that shows the different plants that have been successfully grown on artificial islands in three similar projects. Based on the tests conducted for this project, I recommend tomatoes, lettuce, cabbage, and mint.

Biomatrix Water

Forres, Scotland

Chinampas
Mexico City, Mexico

Urban Rivers
Chicago, USA
