

How to use this presentation

Used just for measurements

The large picture is to show the details (there is not much details in this project but it helps)

This neon picture is to make drawing on tracing paper easier when it is dark in the work place

This picture is supposed to be the same size as the final duo would be (it is easier to change the zoom so every thing changes at the same rate)

All shapes in the circle are the same size

This slide is just instructions
