

Cutting template and scale table

by Talty

Use this guide to cut a cake, pie or anything round perfectly everytime! You can cut anything from 1/2 to 1/8, or mix them up! You can also use it as a template to find the right size for your cakes in any scale from 1:5 to 1:12, or use the big table as a quick way to find the right size for any miniature.

Print in a regular printer, letter size paper and don't scale it! Measure the circles with a ruler to make sure that it's correctly printed (note your ruler may be 1 or 2 mm off).
