

The comb

The comb

As the comb is a precise tool and difficult to manufacture, I bought it on a specialized site.

You can find different sizes, take one of 52 cm in length.

I chose a comb with a fineness of 0.5 cm.

<https://www.artifilum.com/fr/peignes-en-inox.html>

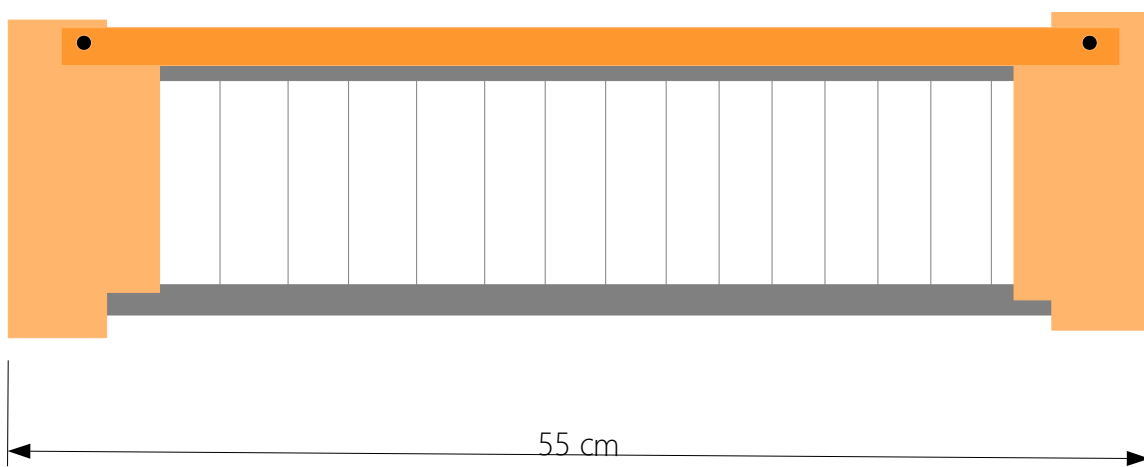

- Make two wooden pieces to hold the comb on each side, to hold it on the frame. The whole must be 55 cm long

Front view

From above

To finish, you can glue felt to decrease the noise when using the loom
